- Kraftform bitholding screwdriver with 6 mm hexagonal blade mounting for combination blades (double blades) from the Wera Vario range
- The ratchet with fine toothing integrated in the handle allows fast working
- Intuitive switching: If I turn the switch clockwise - the ratchet turns clockwise, if I turn the switch counterclockwise - it goes counterclockwise
- Use position 0 to deactivate the ratchet mechanism for precise working
- Includes 6 Vario double-end blades
- In a robust folding pouch with Wera 2go compatibility

7-piece blade set. One Kraftform bitholding screwdriver with 6 mm hexagonal blade mounting for combination blades (double blades) from the Wera Vario range. The ratchet with fine toothing integrated in the handle allows fast working. Switching the screwdriving direction is intuitive: Turn the ring switch clockwise for clockwise screwdriving, turn it counterclockwise for counterclockwise screwdriving. Use position 0 to deactivate the ratchet mechanism for precise working. The 2-component Kraftform handle with the combination of hard and soft zones allows for a firm grip and precise working. 6 Wera Vario double blades (= 12 different profiles), 175 mm long, 6 mm hexagonal. In a robust folding pouch.

Kraftform Kompakt Vario with ratchet functionality

The handle/blade system Kraftform Vario

The Kraftform Vario handle/blade system allows for lightning-fast change of the required double blades and thus a wide range of applications.

Innovative ratchet mechanism

The ratchet with fine toothing integrated in the handle allows fast working. The innovative ratchet mechanism also allows fast "spinning". A real problem solver when there is no resistance from the screw.

Intuitive switching, and deactivation of the ratchet functionality

Intuitive switching of the ratchet mechanism. Turn the switch clockwise for clockwise screwdriving; turn it counterclockwise for counterclockwise screwdriving. Use position 0 to deactivate the ratchet mechanism for precise working.

Ratchet mechanism allows "spinning"

The innovative ratchet mechanism also allows fast "spinning". A real problem solver when there is no resistance from the screw.

Vario double-ended blades

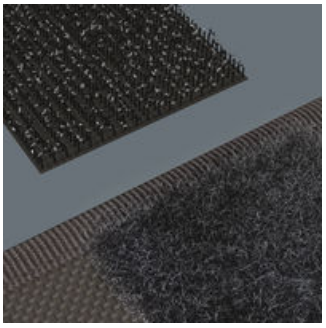

The 6 mm double-ended blades of 175 mm length are out of high quality bit material which gives them a particularly long service life.

Kraftform

The basic idea for the prototype of the Kraftform handle - that the hand should dictate the design - has, right through to today, proved to be correct. In cooperation with the internationally recognised Fraunhofer IAO Institute, Wera developed a screwdriver handle designed to match the shape of the human hand as long ago as the 1960s. After a long development phase, the Wera Kraftform handle was launched to the market in 1968. It has been optimised through the years with new technologies, but has kept its proven shape. After all, the human hand has not changed either.

Flexible due to hook and loop fastener strips

The textile box features a fleece zone at the back. Using the provided self-adhesive hook and loop fastener strips, the textile box can be attached to the Wera 2go components. Or to the wall, shelf or workshop trolley.
